

The background of the entire page is an abstract composition of various shades of blue. It features overlapping, semi-transparent geometric shapes, primarily triangles and polygons, which create a complex, layered effect. Scattered throughout this blue field are numerous small, dark blue dots. Some of these dots are isolated, while others are connected by thin, light blue lines, forming a network or constellation-like pattern. The overall aesthetic is modern and digital.

Ernest Muroiwa

PROJECT PORTFOLIO

About Me

I am a full stack developer, result-oriented professional with growing experience in application development & enhancement, service delivery and client relationship management in Banking and Financial sector.

In my current role I develop applications for use in the day to day operations of the business.

I'm truly passionate about my work and always eager to connect with other developers. While I enjoy all aspects of my job, i have no language preference, any language will tickle my fancy.

I am an Honours Degree Information Systems graduate with the Midlands State University Zimbabwe and I'm always interested in hearing from colleagues, managers, or just interesting creative folk, so feel free to contact me if you'd like to connect.

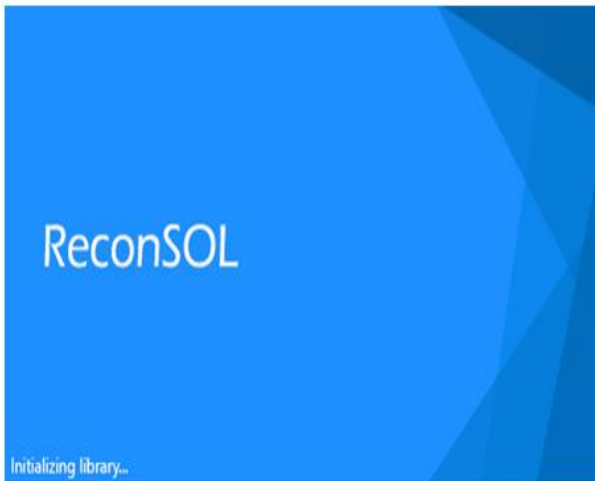

Clients

I have developed i.e. web, mobile and windows applications and websites for a number of clients in various economic sectors

Project

ReconSQL

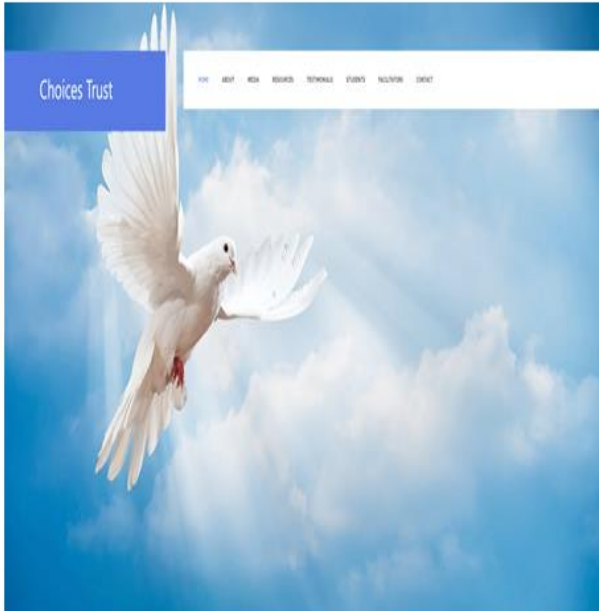

**Client: Universites
Schools
Retail Chains
Tobacco Processors**

ReconSol enables automation of every step of the bank reconciliation process – importing data files, matching data, and generating reports. Accounts for reconciliation can be organized according to the specific needs of the business and information can be accessed from multiple accounts simultaneously. Management and other concerned users can be notified automatically of exceptions in bank accounts and easily check on the status of any exception investigation. All bank reconciliation activity is recorded in an audit trail automatically with our software.

Project

Choices Trust E-commerce Solution

URL : <http://choicetrust.com/>

Client: Choices Trust

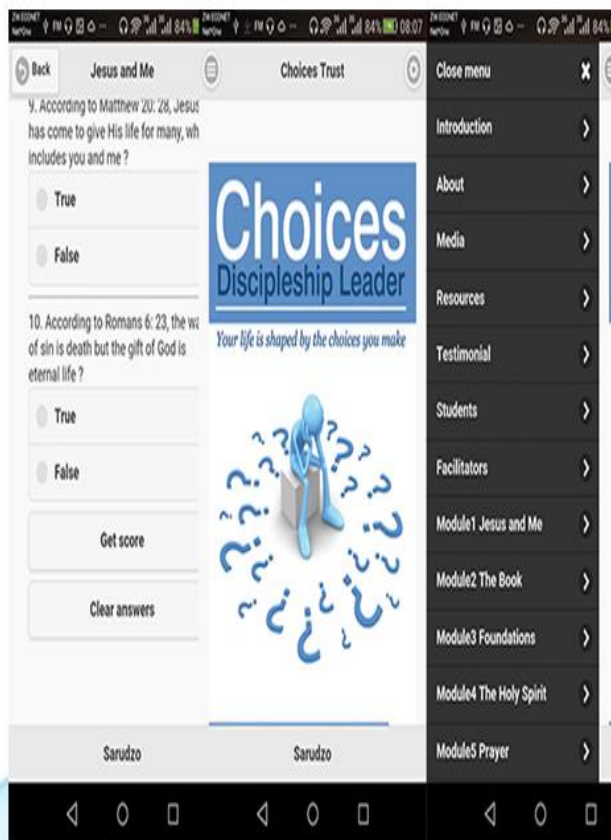

Choices Trust E-commerce Solution. Is a church community website. That provide the client with an online e-commerce platform to sell their various church production. The website has a Facebook like social media platform to enable church goers to interact online. The website backend allows the church to send bulk SMS to church goes to provide information to them.

GM58 Stand Management System

The screenshot displays a web application interface for 'Stand Payment'. It features a table with columns: Number, Location, Purchase Date, Investment, Area, STATUS, and UPLOAD BALANCE. The table lists 10 entries for 'Northgate Heights' with various purchase dates and investment amounts. Each entry has a 'STATUS' of 'Payment_In_Progress' and an 'UPLOAD BALANCE' button. The interface also includes a search bar and a pagination control at the bottom.

Number	Location	Purchase Date	Investment	Area	STATUS	UPLOAD BALANCE
1	Northgate Heights	2015-02-24 00:00:00	500	2000	Paid	Upload Balance
10	Northgate Heights	2014-10-21 00:00:00	328	2000	Payment_In_Progress	Upload Balance
101	Northgate Heights	2015-11-12 00:00:00	180	1200	Payment_In_Progress	Upload Balance
102	Northgate Heights	2014-09-07 00:00:00	133	1200	Payment_In_Progress	Upload Balance
103	Northgate Heights	2014-02-07 00:00:00	238	1200	Payment_In_Progress	Upload Balance
104	Northgate Heights	2014-09-07 00:00:00	130	1200	Payment_In_Progress	Upload Balance
105	Northgate Heights	2014-02-07 00:00:00	118	1723	Payment_In_Progress	Upload Balance
106	Northgate Heights	2014-01-07 00:00:00	120	1723	Payment_In_Progress	Upload Balance
